

ENVIRONMENTAL POLICY DOCUMENT OF KHARUPETIA COLLEGE 2022-23

About Kharupetia College:

Kharupetia College stands as one of the leading institutions of higher education in the Darrang District. Its inception in 1981 is a testament to the tireless efforts of the visionary individuals from the greater Kharupetia locality. Initially established through private endeavors, the college transitioned into a government-aided institution on March 25, 1998, under a deficit system of grants-in-aid. Subsequently, it was provincialized by the Government of Assam on December 1, 2005, according to Government notification No. LPG. 112/2005/158 dated December 19, 2005. The college holds recognition under section 2(f) & 12 (B) of the UGC Act, 1956, signifying its compliance with the University Grants Commission standards. Affiliated with Gauhati University, it underwent assessment and accreditation by the National Assessment and Accreditation Council (NAAC) in October 2004. Offering both Higher Secondary and Degree Courses in Arts and Commerce streams, Kharupetia College boasts an impressive track record of performance in various University and Council Examinations.

Need of Environmental Policy in Higher Education:

The environmental policy of higher educational institutions demonstrates their dedication to environmental sustainability and provides a foundational framework for incorporating sustainable practices into campus operations, academic programs, and community outreach. Although specific policies can differ between institutions, common elements often include:

Mission and Commitment:

The policy opens with a declaration of the institution's commitment to environmental sustainability, natural resource conservation, and minimizing environmental impact. It aligns with the institution's overarching mission and values, highlighting the significance of environmental stewardship in achieving its educational and societal responsibilities.

Legal Compliance:

The policy recognizes the institution's responsibility to adhere to relevant environmental laws, regulations, and standards at local, regional, national, and international levels. It pledges to maintain compliance with these environmental requirements and to continually seek improvements in environmental performance.

Resource Conservation:

The policy underscores the importance of conserving natural resources, including energy, water, and materials, through efficient use, conservation practices, and the adoption of renewable energy sources. It establishes goals for reducing resource consumption, minimizing waste generation, and encouraging recycling, reuse, and composting initiatives on campus.

Pollution Prevention:

The policy expresses the institution's commitment to pollution prevention and environmental protection, aiming to minimize air, water, and soil pollution. It details strategies for reducing emissions, managing hazardous materials, and preventing environmental contamination through responsible waste management practices.

Sustainable Operations:

The policy advocates for sustainable practices in campus operations, covering areas such as facilities management, transportation, procurement, and food services. It promotes the adoption of eco-friendly technologies, green building design principles, sustainable transportation options, and environmentally preferable purchasing practices to lessen the institution's carbon footprint and ecological impact.

Environmental Education and Research:

The policy emphasizes the importance of embedding environmental education, research, and outreach into academic programs and extracurricular activities. It encourages interdisciplinary collaboration, fosters environmental literacy among students, faculty, and staff, and supports research initiatives aimed at tackling environmental challenges and developing innovative solutions.

Community Engagement:

The policy highlights the institution's role as a responsible community member and promotes partnerships with local stakeholders, government agencies, nonprofit organizations, and businesses to further environmental sustainability goals. It encourages community outreach, environmental advocacy, and collaborative initiatives that contribute to the broader objective of sustainable development.

Monitoring and Reporting:

The policy sets up mechanisms for monitoring, evaluating, and reporting on the institution's environmental performance and progress toward sustainability goals. It may include provisions for regular audits, tracking key performance indicators, and publishing annual sustainability reports to transparently communicate achievements and challenges.

Overall, the environmental policy of higher educational institutions demonstrates their commitment to environmental stewardship, sustainability, and social responsibility. It offers a framework for embedding sustainable practices into all facets of institutional operations, fostering environmental leadership, and inspiring positive change within the campus community and beyond.

Environmental Policy of Kharupetia College:

Kharupetia College, situated in the Darrang district of Assam, stands out as a prominent educational institution in the region. Established in 1981, the college has consistently fostered a distinguished academic environment for both students and faculty. Demonstrating a strong commitment to environmental awareness, the college has initiated several green initiatives aimed at preserving its natural surroundings and ensuring a pollution-free campus. This collaborative effort, engaging the college administration, students, staff, faculty, and other stakeholders, highlights a shared dedication to safeguarding and nurturing the college's green environment.

Environmental Policy Statement of Kharupetia College:

Kharupetia College is committed to conserving the natural environment, developing sustainable solutions, promoting rural and traditional technologies, and controlling energy consumption. Our objectives are:

- Raise awareness among students about conserving natural resources and fostering a sustainable environment within the college.

- Promote the plantation of indigenous species to preserve ecological balance on campus.
- Conduct regular green audits to monitor and maintain our environmental initiatives.
- Implement rainwater harvesting using traditional rural methods across the campus.
- Strive to achieve a pollution-free environment encompassing air, water, soil, and sound.
- Educate stakeholders on efficient water usage to minimize wastage.
- Install bio-friendly dry and wet dustbins for effective waste collection and management.
- Reduce paper usage and promote a paperless office environment to minimize paper waste.

These commitments underscore our dedication to environmental stewardship and sustainable practices at Kharupetia College.

Policy Objectives:

The environmental policy of Kharupetia College aims to achieve the following objectives:

- Educate and involve students and staff in environmental issues and sustainability.
- Promote and value traditional rural technologies for the conservation of the natural environment.

Environmental Policy Statement of Kharupetia College:

"At Kharupetia College, we are committed to cultivating a culture of environmental responsibility, stewardship, and sustainability. We acknowledge the critical need to conserve natural resources, reduce our environmental footprint, and advocate for eco-friendly practices across our operations. Through collaborative efforts, innovation, and ongoing enhancement, we

endeavor to safeguard the environment, improve quality of life, and ignite transformative change within our campus community and beyond. Our goal is to set a precedent, educate stakeholders, and contribute to a healthier, sustainable future for generations to come."
