Paper: 620 Project paper

It trains the students to undertake research in various fields.

9. OUTCOME OF COURSES UNDER BA GENERAL PROGRAMME IN MATHEMATICS

Paper-1: MAT-RC-1016: CALCULUS:

Course Objectives: The primary objective of this course is to introduce the graphs of functions and basic tools of calculus and geometric properties which are helpful in understanding their applications in real world problems.

Course Learning Outcomes: This course will enable the students to:

- i) Learn differentiability, limit and continuity tests for functions.
- ii) Learn different theorems alongwith their geometric properties.
- iii) Learn partial differentiation of functions

Paper-2: MAT-RC-2016: Algebra:

Course Objectives: The primary objective of this course is to introduce the basic theory of equations and trigonometric function, matrices and determinant as well as algebra of vector spaces

Course Learning Outcomes: This course will enable the students to:

- i) Employ De Moivre's theorem to solve problems.
- ii) Learn about matrices, determinant and application in solving system of euations
- iii) Learn about vector space algebra and their application

PAPER E 303: Calculus: Methods and applications

Course Objectives: The primary objective of this course is to introduce the graphs of functions and basic tools of calculus and geometric properties which are helpful in understanding their applications in real world problems.

Course Learning Outcomes: This course will enable the students to:

PAPER E 403: Calculus: Coordinate Geometry and Vector Analysis

Learning Objectives : To plot the points in coordinate plane.

- To apply distance formula to find the distance between two points.
- To use Section formula to find a point between two given points with a given ratio.

PAPER E 503: Statics and Dynamics

- Dynamics is the study of the motion of objects (i.e. kinematics) and the forces responsible for that motion. Nothing that moves can be analyzed without using dynamics concepts.
- It is also important for understanding everyday things that are of interest to many of us, such as the physics of sports, and amusement parks.

PAPER E 504: Numerical Method and Spherical Astronomy

- It imparts the knowledge which are applicable for Combinations of both methods have also been developed.
- Numerical modeling enhances the understanding of mechanical processes in rock by conducting numerical experiments, and is useful for design and construction works.

PAPER E 603: Linear Algebra and Complex analysis

- It explain the concepts of base and dimension of vector space.
- To be explain the concept of dimension of a vector space.

- It express vector spaces in different dimensions.
- It explain base concept of a vector space and properties of vectors on the base

PAPER E 604: Advanced Calculus.

- It imparts the knowledge about the study of Developing calculus skills requires careful practice and repetition in a wide variety of different mathematical problems.
- Learning calculus online lets students work on complex problems over time and return to amend mistakes if required.
